250GB Samsung EVO 840 SSD
http://www.samsung.com/global/business/semiconductor/minisite/SSD/M2M/html/ssd840evo/specifications.html

Corsair GS600 PSU
http://www.corsair.com/en-gb/gs600w

And a DVD Writer.

SSD and Motherboard firmware's are updated to the latest.

The case has 2 front fans, 1 rear, top and side removable panels with dust filters. Also the front panel can be opened from the left or the right.

All this system needs is a GPU and you will be good to go for 1080p maxed out!

Windows 10 x64 is installed with some extras like Office 16 and fully updated with latest drivers and so on.

The only box's I have are for the Corsair H90 and the Motherboard.
