BECOME A PROFESSIONAL GRAPHIC DESIGNER - with our online flexible or fixed study options

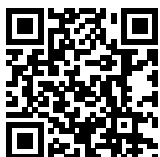

It doesn't matter if you are a beginner or a professional in graphic design, we have the right course for you at the right level.

Graphic Design courses are available everywhere now, but we are one of the very first to provide a unique online school which focuses on each individual student. Our knowledge of the creative industries are vast, so we are able to guide you to a successful future in Graphic Design.

All of our Graphic Design Courses are designed to help you progress onto the level you wish to achieve. We even have additional courses which we add throughout the year, which includes evening classes, live training events and even tailored courses for business, organisations and individuals.

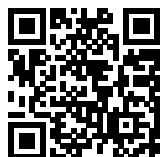

Right from the start of your chosen course you will be given your very own one-to-one tutor and training coach who will work very closely with you to establish your strong and weak areas. But firstly, we have to find the correct level for you to start at.

There are different levels you can start at, but if you are not sure which is the right level for you, then talk to us as that is what we are here for.
