http://www.i-netsolution.com/home/products/mlm Multi-level marketing (MLM), also called pyramid selling, network marketing, and referral marketing, is a controversial pyramid-shaped marketing strategy where profit is theoretically derived from two revenue streams: from a sales force of a participating salesperson recompensed by means of the direct sales generated by the salesperson, as well as from the sales of other salespeople that the participating salesperson has conscripted and of their recruits down the line. We have contributed this MLM Software Company under PHP platform which has high speed response among others. Our MLM Software has more peculiarity as profile management which contains the entire details such as payout calculation, mail box, genealogy view, request options and transaction details. Your customer can prospect and utilize the genealogy details that contains the place where should be in the tree structure. This script is also serve to refer the people and get the commission for their referral then the chain is continued as per its type where the plan details were varied. You can merge any concept to sell your any of the product via this MLM software.
