Location   North, South Wirral
https://www.freeadsz.co.uk/x-543498-z

We are happy to announce RentALL - Airbnb clone script v1.1.0 with some amazing features and improvements.
 We are grateful to all our customers who provided valuable feedback to making RentALL(Airbnb Clone) a better product for building amazing Sharing Economy platforms. Of course, we are still getting lot of feedback and we keep improving RentALL(Airbnb Clone Script)
 "Build something simple and faster and then make it perfect!"
 I would like to share some highlights of "RentALL - Airbnb Clone Script v1.1.0 " and there are always more, you can feel free to try our demo at http://www.rentallscript.com
 iCalâ€Š—â€ŠSync Your Calendars Anywhere, Anytime
 iCal is one the most wanted feature that allows host to Sync their calendars with any external calendar applications such as Airbnb, Wimbdu, HomeAway and even Google Calendar. This sync is automatic, once you have added the Calendar that will sync with your RentALL's(Airbnb Clone Script) Calendar at real time. You can also, share RentALL(Airbnb Clone Script) calendar anywhere :)
 SEO & Social Media Friendly View Listings
 View listing is the one of the important page where host can provide more information of their listing to attract new customers. Users can also send request to host and make bookings from there. After getting some valuable feedback from our customers, we made View listing page to be more SEO and Social media friendly. It helps host to increase the number of visits and bookings of their listings.
 Improved Message Action Blocks
 Interactive Messaging system in RentALL - Airbnb Clone Script, helps Host and Guest easily communicate with each other. It doesn't stop with just communication, now Host and Guest can make some actions for their respective reservation activities.
 Improved Cancellation Polices
 Cancellation Policies are the script to reduce the risk of cancelling reservations by guests. In the other hand, these Cancellation Polices helps guest to understand the outcome when will happen if they want to cancel their reservation. In this version, we have made some performance improvements and made the interfaces more user-friendly.
 Improved description area for listings
 We have made the description area more user-friendly for the host to add and make edits for their listings. It will help hosts to create readable description without spending more time on aligning the content.
 As I mentioned above, it's always more :) Please try RentALL(Best Airbnb Clone) demo today and share

your thoughts. We would really love your feedback :)

What's next?

We are already onto the next big thing for RentALL(Airbnb Clone Script). It's Multilingual feature :) Stay tuned, new version is coming sooner than we thought!
