Unsecured Business Loans:

Specialists in Alternative Finance: An Alternative finance is becoming much more mainstream than ever before. The specific financial challenges facing businesses will often be unique to that particular business therefore choosing the right source of finance should be as unique as the business requiring it. We give specialist and impartial advice to businesses seeking help with raising finance. We are Financial Conduct Authority regulated and are members of the National Association of Commercial Finance Brokers.

Why alternative lenders differ to high street lenders: The speed they can lend. You can have cash in 24 hours if you need it They are paperwork light, generally only studying the historical data of a business as part of the assessment They work with other lenders Specific financial challenges can be sorted such as VAT bills Multiple options that can work together to provide a comprehensive solution Prime to sub prime options Intangible reasons for loan accepted ie Cash Flow, expansion or marketing Most significantly this is usually UNSECURED lending backed only by a personal guarantee. The borrower doesn't need to be a homeowner and if they are, the lenders do not put a charge on the property if the personal guarantee is strong. As "one size certainly does not fit all when it comes to financial requirements we have a broad range of solutions to help all types of businesses, at various stages and in some cases, with some challenges.
