Copy Paste Master's Data Recovery Service.

This listing is for a data recovery service to recover data from your hard drive with symptoms such as clicking noises, beeping noises, no power, not recognised, inaccessible drive and many more.

Only files and folders can be recovered from the hard drive unless otherwise stated.

Please contact me for details and diagnostic.

Please do not purchase this listing without prior contact otherwise the order may be cancelled.

Terms and Conditions of the service are as follows;

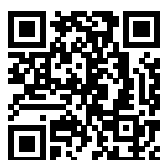

- 1) You are responsible for the shipping of your defective hard drive as well as the cost. You will also need to provide a blank external storage device such as a USB flash drive or external hard drive. It is highly recommended you use a trackable postal service such as Royal Mail Tracked or UPS. You will also be required to include a note inside the package of your name and address to easily identify you being the sender and owner of the hard drive.
- 2) You will be notified when the hard drive has been received and confirmation that the hard drive will be inspected and diagnosed.
- 3) Subject to the nature of the fault of the hard drive, it is possible a longer time frame is required to source spare parts or recover the data. You will be updated frequently if this is the case.
- 4) Best efforts will be made to try and recover the data from your defective hard drive. If in the unlikely event the data cannot be recovered, the defective hard drive will be returned back to you using a trackable postal service and a full refund will be processed without a fuss or hassle (excludes shipping cost for when you posted).

By purchasing this service you are fully aware of the above terms and conditions and this listing's copyright will act
