

Technicon Engineering Services Ltd Technical Electro-Mechanical Solutions

TECHNICON ENGINEERING SERVICES LTD.
ENGINEERS & EPC CONTRACTORS.

Location **London, London**
<https://www.freeadsz.co.uk/x-556717-z>

Technicon Engineering Services Ltd is a multi-discipline Company, has in its fold the experience and background of sophisticated construction technology, it has successfully completed diverse and complex projects such as Industrial Plants, Hydel Power Stations, Thermal Power Plants, Energy Resources Projects, Applied Research, Heavy Steel Structures etc. Thus it has successfully established itself in the field of Construction, Fabrication, Erection, Turn-key Projects, and as a leading organization with best technical and human recourses backed by a team of best technical and professional executives and engineering staff by sound financial resources. Technicon Enterprises is determined to take a meaningful contribution towards the national endeavour to usher in a new era of economic progress and prosperity.

Power Plants

Technicon Group has diversified experience in providing services for large-scale Hydel power projects and has established itself as the preferred contractor for leading international firms engaged in power plants projects.

In addition to detailed engineering and construction, we have extensive experience in construction of draft tube, spell ways and generator floor.

Process Engineering Solutions

From large turnkey projects to small consultancy assignments, we work hand-in-hand with our clients to design and develop class-leading systems. Proudly independent, totally impartial, we have the people and skills to deliver the most demanding of projects assignments.

Steel structures are the backbone of many industrial and commercial buildings. Technicon Engineering Services Ltd specializes in the design, fabrication, erection and maintenance of steel structures of buildings, bridges, towers, chimneys, etc. Our experienced team of highly skilled professionals can handle all aspects of steelwork, from structural steel to ornamental steel, and provide a complete end-to-end service for your building and technological structures.

Renewable energy/hydropower stations
From the early stages of planning, permitting and compliance in renewable energy engineering through detailed design and construction management, our engineers are experts in hydropower project development, plant rehabilitation, retrofit and upgrade for conventional and pumped storage. Specialized expertise includes water intakes and outlets, penstocks, powerhousees and water conveyance systems on

hydropower projects ranging from less than 20 to more than 2,000 MW.

Mechanical & Piping Construction

We implement years of experience in the field of mechanical and piping industry.

Automotive Industry

Manufacturing of customised spare parts for automotive industry is in the company's manufacturing pipeline.

Mechanical drawings and Technical specifications

We have a vast database of specialised mechanical products ranging from design drawings to complete technical specifications from small to large scale mechanical projects. First free consultation regarding any type of technical adventure.

Hydroelectric power stations

Selecting a potential site, turbines, complete design and fabrication of penstocks, tailrace, trash rack cleaning machine (TRCM), Radial/sluice gates, Designs of fish ladder (acoustic/classic) is nothing new for us.

Technicon provides services in following areas:

EPC Contracts of Civil and Electromechanical projects. Thermal Power Plants. Energy Resource Projects. Applied Research. Industrial Plants. Heavy Steel Structures. Power Supply and Electrification. Off-Shore/On-Shore Piling. Design, Fabrication, Installation of steel structure, i.e. High head penstock pipe, pressure vessels, Storage Tanks etc. Hydraulic Gates, Hoisting system, Gate automation, TRCM machines and other non-standard hydraulic and Hydropower Station components. Rehabilitation of Hydroelectric Power Houses. Development of Standard Parts for Industries. Low and Mid Volume Sheet Metal Fabrication. General Machining Works. Design Drawing, R&D, 3D Modelling and Shop Drawings for Innovative and Custom Built Products. Prototype Manufacturing and Testing. Custom Built Formwork for Construction Industry. Bolt-Up Flanges, Studs and Rods etc. Customized Anchor Products. Profile Cutting. Pre-Fab Structures.

FIRST FREE CONSULTATION ON ANY TECHNICAL ELECTRO-MECHANICAL PROJECTS.
