Celestron Granite 7x33 ED Water Proof Roof Prism Binoculars: The 7x33 roof prism binocular is a short to medium range binocular with superb performance. The binocular incorporates advanced optical and mechanical design for precise functionality. Extra low dispersion objective lenses reduces the chromatic aberrations and provide accurate color reproduction. The binocular can focus as close as 1.98m for close up observations. The multicoated optics transmit more light and offers brighter sharp images. The higher eye relief makes it easy to view with a distance from the binocular, the feature is much beneficial to the eye glass viewers. The binocular is best for bird watching, action sports, wild life view and general out door observations. The Granite 7x33 is made from durable light weight magnesium alloy and armoured with non slip rubber to protect against accidental damages to the binocular. The binocular is tripod adaptable for long session stable viewing. The binocular is water proof and nitrogen purged to prevent from the weather.
