Vox bass amp & cabinet circa 1971, A superb Vox Foundation Bass amp & Dynamic Bass cabinet with 1 x 18" speaker. These were the first Vox solid state series of amps & were made between 1967 - '72. This is one of the later ones, around 1971 (I think!). The amp is in pristine, totally unmarked condition, It has a 2 input bass channel & a 'normal' channel for lead/rhythm/keyboards. I don't have the foot switch, but you could easily get one made up. The Dynamic Bass cabinet is in very good condition with just a few small scuffs to the vinyl covering. It has a tubular chrome frame with a stand for the amp, & built in wheels. Everything is working fine & has a great sound & fantastic looks. One owner from new. Never gigged. Please message or ring me on 07796 081954 if you want to try it or have any questions. Thanks, Pete. £550.00,,.
