Ampeg SVT 3 PRO - Bass Guitar Amplifier, This is an amazing sounding hybrid bass guitar head, powerful (450@4ohms, 275@8ohms) and made for rock and any other genre. I bought it new back in 2000 and the tubes have last been replaced in 2008 (as well as being PAT tested, see label on one of the photos) but since then I only used it twice for studio recordings as I used to live in London and used a more portable head for gigs/rehearsals. It comes with the pictured flight case (which has seen a lot of action in over but it still does the job) and a speakon cab lead.?Anybody is more than welcome to come and try it out before buying.? £499.00,,.
