Photography lessons from beginner to advanced, Hello and thank you for reading this ad. I offer photography lessons to either complete beginners or those who have been capturing images for years and want to fine tune their skills. My lessons start at £20 per hour and I am completely happy to teach either in your own environment, at my home in the countryside, or in the environment you wish to photograph. I have been capturing images since I was 12 years old, I am now 34 and have never become bored of photographing the world we live in. I now work within the photographic industry for a camera manufacturer as a photographer, trainer and educator. The styles of photography that I can teach are: Portrait - using both ambient and studio lighting. Street photography Wedding photography Corporate photography Abstract photography Architectural photography Macro photography Wildlife photography And many more... For a link to my website please email and request website link. If you would prefer home visit lessons, the cost of lessons are the same for up to 5 miles radius of Bedford. Beyond that distance I can quote when you get in touch., Bedford.,
