Have you 2D drawings or legacy data that you need modeled in 3D? We use Autodesk Inventor Professional to offer you a professional service by traditional qualified design draftsman (30 years experience). We will work from your drawings to exacting BS standards, including tolerancing and if required FEA analysis. Any project type, whether that be conservation or restoration of vintage machines (aircraft, cars, trains, tanks and vehicle) or new project development utilizing legacy data. Extensive experience in the Oil industry, Power Distribution Sub Stations, Pharmaceutical Plants, Historical Aviation Restoration and Steam Engines for museum exhibits. Prototyping services are also available where you need only provide a sketch of your concept and we will turn that into a 3D proposal for you. Competitive rates and accurate production of your data to 3D according to regulatory specifications and your own standards. We are qualified Quality Auditors and CE Marking. All models will be provided initially in Inventor native format but translation to other formats can be provided. Incorporated intelligence to your specification and if required to be in compliance with BIM standards. ;
