No MOT but does run needs a new battery or possibly just a jump start as it hasn't been ran in a few weeks but would say in need of a new battery to be on the safe side which I know would only cost about £20,£30. The reverse gear seems to have come out of place so would need looking at but apart from that its all good. It does still drive without the reverse gear but of course it doesn't reverse, it's a case of letting the car roll back if reverse is necessary. Outside of car is in good condition considering it's age the worst of the markings have been pictured but they are very minor. Inside again in good condition. Cash on collection. Any questions ask.
