

We fix PC problems for 8.00 an hour and we are very good at it

Location **South East, Middlesex** https://www.freeadsz.co.uk/x-171616-z

Hi.....And what is the desktop picture above all about....it's called "one click computing"....with EVERYTHING YOU WANT on your desktop. And what is everything...the best of the best meaning......the best security (and we explain why), free TV and movie links that let you watch anything EVER produced on film WITHOUT ADS so quit paying for HBO or NETFLIX, a complete and free office set up that gives the typical user what Microsoft sold for hundreds of dollars, maintenance made simple with the best tools that exist also (and we continuously evaluate them and will give you updates no charge). If you want more information you can contact us and we will send you (if you like to read) a very thorough (beware) explanation of half of what we do (just to impress you).And PS we fix almost all software problems on any Windows based system, but may require a little help from you......"turn it back on since sometimes I have to reboot". And did I mention I do this over the Internet so you can watch while I work. Thanks in advance, CRO
