

Cheshire Loft Storage Solutions - Boarding Ladders Hatches Lights

Location **North, Cheshire**
<https://www.freeadsz.co.uk/x-171801-z>

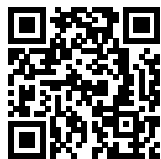

When choosing a reliable trustworthy company to do work in your home always check they are credible by visiting the Safe Trader Website operated by County Council Trading Standards or your local Trading Standards. Always ask to see PLI ELI insurance documents. Check to see if they are qualified by viewing their certificates and check with the manufacturer to make sure they are approved installers of any products. Please be aware that there are fakes passing themselves off as our company, please be careful as these fraudulent companies are not qualified or factory approved and will probably not have adequate insurance or any references. Get references from recent jobs, at least three and call these customer refs for proof. Get the companies address, land-line number and VAT registration number. Get a written quote on a company headed quote sheet with the companies full details on. Now if you want a family run company who are dedicated to loft storage solutions and are professional, qualified, factory approved, insured and registered as a real business then read on. We use only the best quality materials and the installations are always to the highest standards possible. No corners are ever cut. The staff at Cheshire Loft Storage work hard, and are highly skilled in their field. They are reliable, punctual and trustworthy and pride themselves on those traits. The company is fully insured with £2 million PLI and ELI cover with AXA insurance. Staff training and development is very important to us. Each member of the team is fully trained and their training is updated regularly. They also work to all building regulations and comply with the latest health and safety requirements and guidelines. We have joined forces a couple of years ago with the manufacturer of one of the main products the company uses in its installations, Loftzone Raised Loft Floor which allow the construction of a raised loft floor above the insulation level to avoid squashing or removal of the insulation.. We provide everything you need to turn your empty dusty loft in to a safe

strong easy to access storage area and the majority are done within the day. Clean and tidy, quick, neat and professional. We always aim to do what we can for your home in one day. Visit our website with the information on how to board, hatch and light your loft and how it should be done. There can be a lot of information out there but its not the same that we have at CHESHIRE LOFT STORAGE. We are based in NW Cheshire and we board, hatch and light the rest of the north west. Search on Bing for LOFT BOARDING NW You will find us just about everywhere in the Northwest More Info: Call
