An orthopedic mattress is a mattress designed to support the joints, back and overall body. As its name suggests, an orthopedic mattress have been created to combat the problems one might experience with a bad back or joints by providing a firm mattress which offers targeted, tailored support.

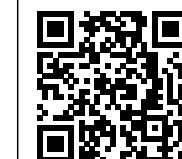

I bought this for my mother to go on a hospital bed but it was too thick, it didn't "bend" so the NHS supplied one.

Unfortunately her cat decided to scratch it in a few places that can be clearly seen in the photos. Apart from this a spill has left a small stain. However its hardly been slept on so I don't want to bin it. It is 35" wide, & 11".
