

EliGrass Premium Artificial Grass

Location

East Midlands, Nottinghamshire

<https://www.freeadsz.co.uk/x-173810-z>

Thanks to its new fibre with a concave section and central nerve, it behaves like a living surface, restoring to its original position after being walked on. Its innovative design and filament bi-colour make it a natural-looking, low maintenance artificial grass. Our advanced synthetic grass is used nationally and internationally in all types of application settings including: residential, commercial, sports fields, golf & putting greens, schools, parks, playgrounds, and other recreational areas. EliGrass ranges are made from the highest quality materials and fibres in the industry, quality tested, safe tested, and backed by a 10 year.
