Very reluctant sale due to new company car. We've had this car for 4 years and she's been extremely reliable and easy to run. Has all the mod cons, leather/heated seats, sat nav, air con. All in full working order. Mileage @ 182,000 but 90% has been done up and down the motorways while we've had her. 6 speed manual and the better 2L Diesel engine makes it zip along the lanes like a much smaller car, 70mph revs around the 2000 mark and acceleration is so good the engine doesn't need to go over 3000 in any gear, amazing. If I'd ever gone to the dizzying heights of 90 in this car I would imagine it would be a really smooth ride, again using less than 2700 revs. But I haven't... Space is massive in the back and the boot is the biggest we could find in its class for the dog cages. (Yes we tested it and others by bringing a cage....) The electric handbrake (superb for hill starts by the way) means plenty of room in the middle for storage and makes the car feel snuggier than it really is and you really don't feel like you're driving an estate when you're in this. Fuel economy is excellent and, although it's due its next service, still averages between 40 and 50 miles to the gallon. Tax and MOT due December and January. We have named her but feel free to re christen when you get her home. More than happy to take for a test. ;
