Boots Smooth Skin Plus Ipulse - permanent hair removal system. The Boots Smooth Skin PLUS system uses a revolutionary technology formerly only used in salons and clinics called Intense Pulsed Light (IPL). When used correctly, this will provide long-lasting hair reduction. IPL acts when a short and intense pulse of filtered light is directed into the skin. The amount of light supplied by the Boots Smooth Skin PLUS system is carefully controlled in order for the hair follicle to heat up enough to discourage it from growing again, without affecting the skin. You can achieve permanent hair removal within 6-12 treatments if used regularly. Comes with its own case, instructions and a little of the activator gel (You can buy the gel on the Boots website for £3.05) - This was £399.99 brand new with 20,000 pulses. I have used approx 200 pulses. PLEASE NOTE THAT I DO NOT POST.
