Electroplated Nickel Silver (EPNS) Tea Set.

Dated somewhere between the mid to late 19th century to early 20th century, epns tea sets are becoming less common to find. Most sets like this one i have for sale, show varying degrees of wear to the actual silverplate. What did strike my attention with these was the hallmark on one was 666, of course it could be 999, still an unusual find.

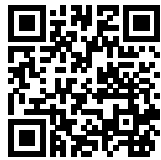

As mentioned these do display some wear of the actual silver plate, but if you keep them polished, this set would make an excellent ornament in a coffee / tea shop cafe.
