This was my van up until about a week ago. when the camshaft pulley fell off. So i am scrapping the van. i am open to offers for the whole van, or i am prepared to sell parts seperately. as long as i can take them off i will. if i cant then you'll have to do it yourself im afraid. this van can be repaired i'm just not prepared to pay to have it done. the rods have been bent and the keyway on the pulley shaft are worn. There are plenty of usable parts including a new sump seal, alternator, exhaust system, lights all round, seats etc etc. all electrics work. please have a look at the photos and give me a call if your interested. the van was towed back to my house but obviously wont start. It has five good tyres also. dont forget this was a working van until a week or so ago, and has been for me for the last 5 years. i have more photos if.
