Blue Audi A4 Saloon, 1.9Tdi (130), 152000 miles, 17" alloys and legal tyres (3 have ~5mm, one has ~3mm). Full size alloy as spare as well. First registered Jan 2003 (52 Plate), MOTd till 1st May 2016. Clutch and DMF replaced at 137k (2 years ago), oil cooler replaced, thermostat replaced and serviced a couple of months ago. Don't have documentation for recent services as I've done them myself.

Car has had radio antenna/amp replaced with newer version (from newer model) so no radio issues, front of radio replaced with that from a newer model so no worn buttons as per other examples. Has tow bar fitted.

Known issues : Button wear on air con/switches as per all other examples this age, aircon no longer works - could be a re-gas required - never investigated. EGR valve blanked off. Some rust bubbling by the roof rails, few little dints here and there and mark on front bumper that i've touched up. Only one remote/key (but have plastic master).
