Really nice car it's a shame I have to sell it really. Spent loads on it in the last 3 months. Will have fresh MOT put on this week by F1 Autos (they're scrupulous). Just off the top of my head since I brought it it's had: New start motor,
New throttle body,
New Bosche CPS fitted (old was giving off an error),
New battery,
4 new Marshall KH35 tyres (excellent grip in all weather),
Brand new Bosche break pads and discs on front,
I'm sure I changed shocks and springs too but will go over paperwork to double check. Just had a good service, using Petronas Synthium oil and crossland filters. Only problem that I know of is with the AC pump, it lets off a little squeal when the engine is started and doesn't seem to work. I think that there is a little leak which needs to be fixed and it needs completely re-gassing, but worst case new AC pump and car is brilliant. Will have 12 months MOT, it's got cream half-leather interior, cruise control, i'm sure i'm forgetting a lot but any questions feel free to ask, genuine reason for sale and viewing welcome. Open to reasonable offers, car has cost me a!
