

Linksys WRT1900AC AC1900 Dual-Band Smart Wi-Fi Wireless Router (100 GBP)

Location

Northern Ireland, County Durham

<https://www.freeadsz.co.uk/x-203077-z>

PERFORMANCE PERFECTED Years in the making, the WRT1900AC is the best router in its class. At speeds of 1.9 Gbps, it delivers unmatched performance for the most demanding networks. Equipped with the industry's first four-antenna configuration and professional-grade 1.2 GHz dual-core CPU, the WRT1900AC provides exceptional signal strength and range. USB 3.0, ESATA, & GIGABIT ETHERNET PORTS TO SHARE FILES The WRT1900AC's four Gigabit Ethernet ports are perfect for transferring large media libraries at speeds 10 times faster than Fast Ethernet. To stream or send large files across your network at high speed, simply connect a flash drive to the USB 3.0 port or an external SATA storage device to the unique eSATA port. For printing or working with smaller files, the eSATA port also serves as a USB 2.0 port. FAST 1.2 GHZ DUAL-CORE PROCESSOR TO SURF, STREAM, & GAME SIMULTANEOUSLY With a professional-grade, 1.2 GHz dual-core ARM processor, the WRT1900AC is one of the fastest Wireless-AC routers in its class. Unlike standard single-core processors which have to switch between data streams and aren't as suited for multitasking, a dual-core processor can handle multiple data streams simultaneously. The result: better efficiency and performance, particularly in today's multi-device.
