Wonderful bit of nostalgia for those of us(or our kids) who used to play with these in the 70's and 80's. The garage and multi storey car park has lots of exciting features(and no need of batteries!)working vehicle lift with crank handle with tinging bell and automatic barrier lifting at each level. There is a little lift for the people at the side,an entrance barrier that is manually operated and a crank turned vehicle inspection lift. On the top floor is marked out parking bays with a working turntable(again hand turned with handle) and a curved road down to the ground floor. It come with four different coloured cars and 3 people and a dog(who can drive the cars). It is in good played with condition for its age, the lithos are looking a little tired but if wanted I can inform the buyer of a seller who prints high quality new replacements taken from the original decals and made by a professional commercial printer(as opposed to a poor quality photocopy) I also have a large number of other sets,Airport,Children's Hospital and play family barn as well as lots of individual items including swing,slide roundabout,minibus,construction vehicles,fire engines and zoo tram to name a few,(check them out on Gumtree in the meantime though I will be listing them on here when I have time)please ask if there is anything in particular you are looking for as I may be able to help. ;
