BTV Solo is a professional music making software available for Windows and MAC OS. This will allow you to create your own music, beats, or soundtracks very fast and easy, without the need of a bunch of musical instruments and expensive equipment. If you have a laptop or a computer with a keyboard, is just enough. You are now able to create music.

BTV Professional Music Production Software works as a standalone application or with your DAW as a VST or AU plugin. If you are inspired, BTV will help you get your ideas out faster. If you're short on inspiration, BTV has a massive sound library and a simple interface to get your creative juices flowing. Whether this is your first software for making beats or if have decades in the game BTV is going to help you make the kind of music you're looking for.

You can arrange full songs with just use your computer keyboard. You don't need any other controllers, any other drums, or any other virtual instruments. You can sequence here. You've got your sound banks here. You can mix here. It's everything you need to get started and go a long way!

Produce anything from simple beats to full songs with rhythm, harmony and melody. Quickly create and build upon patterns using any combination of pre-set sounds, samples you load or from any samples you record. BTV has plenty of professional creative features to speed up your workflow like variable bar length, swing and quantize all adjustable on an individual track basis. The software has a 16 track sequencer and can be played like an instrument which allows you to build your production at the speed of your imagination and hear it play back in real-time.
