IVECO DAILY INSTRUMENT CLUSTER REPAIR (2002-2008)
 £150

The Iveco Daily Dash failure is quite a common fault. On this type of Odometer it is usually caused by internal components breaking down within the Instrument Cluster. The repair is carried out by fully qualified electronics engineers which involves stripping down the Instrument Cluster and replacing internal faulty components to rectify the problem. We do not offer "quick fix" we actually replace the faulty parts with new ones required.. Your mileage reading will also stay intact, so there is no need for mileage correction.

Your Iveco Speedo can be repaired at a fraction of the cost compared with the price of purchasing a new one.

COMMON ISSUES Failing warning lights Speedometer problems Flickering cluster Complete power failure Failing Pixels on screen

REPAIR PROCEDURE

1. Remove the cluster using the instructions on the website
2. Fill out and print our job form on our web site. If you don't have a printer please write the information manually including your post code on the outside of the box for our reference.

3. Sign the form, cut off the address label and secure to the front of the box.

4. We will send it to our Royal Mail Special Delivery service. If you have received the cluster and it has not been repaired, we will call you for a return via telephone. We will send it back to you by Royal Mail Special Delivery service.

We offer a 3 Month Warranty usually with a 24 hour turn around by post.

If you come to our workshop in Waterlooville (near Portsmouth), we are able to offer a friendly 90 minute fast track service. (Appointment only)
