White, The 2015 EVO 2T is equipped with a totally revolutionised and more lightweight rear single shock. Fluidity and reactivity are greatly improved thanks to the new low-friction gas/oil separator and the new interior body finish. The oil tank, coaxial to the gas tank, has greater capacity and offers important benefits in terms of stability and resistance to high running temperatures. The 38 mm Sachs fork, with new white covers, benefits from both the shortening of the rods (-5.5 mm), for a reduction in weight, the progression and improvement of the more aggressive riding set-up, and a more lightweight spring register cap. The reverse mounting of the flywheel means that rotating masses are centred, for increased agility. Thanks to the 12-pole system, greater electric power is available, to the benefit of the electric fan that can remove heat more quickly. The new ignition layout is completed with a magnesium alloy flywheel cover which functions as a stator support, joined at the crankcase by a gasket to ensure a watertight seal for the flywheel chamber. The exhaust, which has a new and longer steel manifold and a new silencer guarantees greater torque at low speeds, without sacrificing performance at high speeds, and noise reduction with a â€•fuller timbreâ€•. The 2015 EVO offers the perfect balance between power and great manoeuvrability. The North Westâ€™s finest family run motorcycle dealership, £4,150 p/x
