I have a concrete coal bunker free to anyone that would like it. It measures 4ft wide x 3ft 2" deep x 35" high. It has a wooden lid that is still usable, but it will require a new one at a later date, which is easily fitted. There is a small portion of a corner missing from the top section , but again that can be easily repaired. Please note it is very heavy so it is a two person job, and a grinder may be required to cut through the bolts as they have corroded. I would suggest a trailer the best way to transport it . ;
