Here I have my seat leon cupra 1.8 turbo petrol I've owned the car for about 4 months and due to selling buying the cupra r upgrade. So let's start with the bad bits....

- . Engine management light is on due to 02 sensor £55 from parkers
- Temp sensor £15 from parkers
- And due to this that's why the engine rumbles a little on idle but pulls fine.
- . Needs 2 tyres
- . 1st gear sometime is a little hard to get into but nothing major selects everyother gear fine and goes well.
- . Tracking is out £15
- . No parcel self.
- . Could do with a battery as it's been stood as I've brought a new car already but starts fine with jump leads.
- . It's got a little tiny dent in the D/S/R door.
- . It's got a dent in the rear bumper due to the missus!! Lol
- . Slight dent in the boot lid was there when I brought the car.
- . Plus one of the silver plastic covers are missing off the front. GOOD BITS....
- . Just had full service = oil, oil filter, air filter, plugs.
- . Rear brakes have just been all done new pads.
- . New rear brake lines.
