

An effective international development programme

Location **London, London**
<https://www.freeadsz.co.uk/x-222204-z>

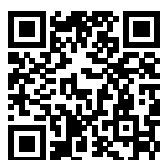

An effective international development programme requires a strong results measurement system. This four week online course will provide you with the skills and knowledge to measure the results of your programme using the DCED Standard, a simple, practical framework that helps programmes to monitor, manage, and demonstrate results. Participants will learn how to develop results chains, design indicators, and select practical measurement strategies. The interactive course will be delivered online in April 2016, and include video lectures, live seminars, presentations from practitioners, a course forum, and guided exercises. Two previous courses have got great feedback from participants; click here to see what they said. For more information, costs, and application details, go to www.devlearn.org. This course is offered by DevLearn, an organisation specialising in practical online training for international.
