

Vintage Horikawa Space Explorer Robot (100 GBP)

Location **South East, Kent**
<https://www.freeadsz.co.uk/x-231941-z>

Reduced by £20 to sell. Highly collectable genuine old & totally original Japanese tin plate & plastic vintage battery operated astronaut Robot. Excellent condition has been in storage for decades in a shoe box in my sideboard. Was a christmas present to me from new so I can assure you it is 100% untouched. Slight pitting on the bright parts but not rusty, dented or scratched. Apart from a little grime which I have no intention of removing it is in great condition. Put batteries in it today & after a jiggle of the clips in the battery case it sprang to life, amazing! He walks, makes a loud noise & shows space scenes on a flip front tv screen. Good strong spring on cover. Never been on the market before or pre-owned by anyone else so pretty unique i think. Enquiries welcome. Maidstone Kent. Cash on collection only please. Thanks for looking at my wonderful vintage.
