It is new in box and wrapping. Don't need to unlock. Not A fancy i phone and no blue tooth . It is a simple to use solid robust phone. Nice design and I have one which unlike my i phone has great lithium battery life. If your into high tech then this is not for you. If you need something solid and reliable its worth the money. Also no hassle with having it unlocked and the cost. I have 3 left. Thanks, Darren. only £
