

Lead Alert ltd LEAD FLASHINGS RESTORATION AND CORROSION REMOVAL AND C

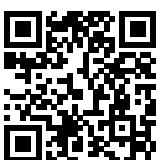

Location

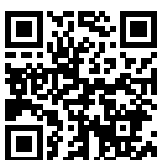

Scotland, Renfrewshire

<https://www.freeadsz.co.uk/x-232376-z>

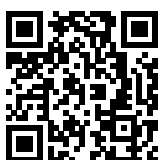

we make your unsightly lead flashings that are corroding and eventually causing leaks into your property safe and waterproof again but it is much more than that , our proven procedure and unique products and our dedication make us the only company or persons than makes this last, as lead flashings are so reactive and toxic that coatings by anyone else only last months and start to rust bleed and flake off and should only be dealt with by specialists like us the problem is mainly on new builds up to 20 years old the lead fitted by your builder is inferior contaminated metal from abroad and I work on 100 year plus some 300 years old sandstone properties and their lead flashings are still lovely what's happened, builders and profits and bad workmanship to replace is to expensive and would cause more damage and what they replace it with is even more contaminated and rusts and tears quicker so that's where I come in, very reasonable and a brilliant job that no-one else can.
