Professional 900 Ideal for treatment of children and "needle-phobia" patients. An accurate alternative to Acupuncture, for those who hate needles! Complete with 144 page instruction book, covering most ailments and health problems including migraines, headaches, hayfever, PMT, and sporting injuries. A remote extension lead is included for use on those 'inaccessible points'. Although this is a few years old, it has not had a lot of use and is in reasonable condition. A separate 24 page booklet is also included for veterinarian use on animals. This is supposed to be for the 1100 machine although it came with the 900 model. It appears to look identical so I am not sure what the difference is, if any. This professional 900 model is still on sale at Amazon so it is still certainly a good unit. It is just no longer required. £
