Ezitil E28 S 12 v Electric Coolbox, complete with 12v car connector and 240v to 12v transformer to run off mains. As new, never been used but been stored for a couple of years...See photos for electrical details...I think the E28, indicates that it holds 28 litres. These are priced at £60 without the 240 to 12v transformer. Mine is priced with the transformer (£25 on amazon), although will deduct £10 if you dont want the transformer. According to amazon, the specs are Thermoelectric Cooler with 12V connection - Capacity approx. 27 Litres. Ideal for the use in cars, for camping, shopping • Delta T up to 15°C

- Holds 1,5 Litre Euro bottles standing upright (36 cm)
- Maintenance-free peltier cooling system
- Additional interior fan for quick and constant cooling effect
- Rubber-sealing in the lid reduces condensation
- When carrying the cooler the handle locks the lid
- Detachable lid - Lid can be opened with one hand
- Cable compartment on the top of the cooler for safely repacking the equipment (12V plug and cable)
- Extra robust and impact resistant body
- High quality EPS-insulation

Capacity (according to EN 12546-2): 27,4
