Fostering February 2016 Fostering February is a campaign aiming to raise awareness about what foster caring involves, alongside dispelling some of the myths and misconceptions which surrounds it. No matter where you are in the country, there is someone near you making a difference to children and young people's lives by offering them the love and everyday human needs they deserve- things which most of us take for granted. So why couldn't it be you? Fostering February is all about learning more about the facts and becoming properly informed on how to become a foster carer; for example, did you know you don't need to own your own home or be married to become a carer? If you are thinking about life as a foster carer, the campaign takes time to answer your questions, and pushes to find out if you could make an amazing difference on a young person's passage to adulthood. If you think you could make a difference, come along to our information events throughout the month and 'Talk To Us' Take a picture with the images shown and please send over fir us via our Facebook page- link from our website at Children First Fostering Agency! https://www.facebook.com/fosteringfebruary;
