

for sale my lowered project skoda felicia pickup  
lowered on coilovers all round.

the interior is tidy and worn well for its age  
the engine is great starts first time every time.  
gearbox tight and no grinding or odd noises.

the previous owner lowered the pickup and has done a fair job it sits nicely on the coilovers

rusted in the usual place the rear tub arches.  
 the panels are available as pattern parts  
 there is a bed liner that can be used to template replacement metal for the tub  
 also a factory tonneau cover

I had planed to pop in a 1.9 tdi lump (included in sale).  
and avoid welding completely by  
treadplate the tub.  
bolt in fabricated heavy duty arches for coilovers.  
twin exhaust stacks with exhaust raincaps  
side bars (to make it look even lower)

custom 5" chrome roll over hoop and give it a "lil red truck" look  
 then swap in my unis, a premium and an elite project bag... to be... first.  
 then... not on the... if you were a... bring...

lowered project 1998 SKODA  
FELICIA PICK-UP 1.3 WHITE  
with 1.9tdi engine
