We have the hands-on networking and wireless training you need to master the skills required to understand, build and maintain your networks. Build your foundation of networking knowledge in a real-world, multivendor environment, and then focus on specialized disciplines with TCP/IP training, IPv6 training and more. Our networking courses help you gain the skills to implement, support, optimize and defend networks, while preparing for industry-recognized certifications, including CWNP, Wireshark and CompTIA's A+ certification and Network+ certification. Basic networking consists of two essential pieces of equipment: switches and routers. If you know how this hardware works, you'll have a fundamental understanding of basic networking as well. Knowing more about basic networking can help you make better decisions about the network design, services, and features your business needs to implement in order to.
