## Features

DS-9092PWC

92" Diagonal 16:9 Pull Down Screen

### Self-Locking Mechanism

### Dual Wall and Ceiling Mountable

## High Quality Screen Materials

PWC projection screens are popular because they are inexpensive and easy to operate. Optoma Manual Screens offer several outstanding features.

They come in two different sizes 92" 16:9 format and 84" 4:3 format to meet most projection requirements.

## Construction

Optoma's matte white fabric is composed of 4 different layers, including a sheet of weaved fibre-glass which helps stop static electricity and most importantly prevent wrinkles and waves. The screen fabric consists of a special material that helps prevent the loss of light, making it compatible with virtually every projector.

The fabrics are designed to be fire, water, and mold resistant and can be cleaned if required. The outside surface of the matte white screen has microdots that are made with PVC technology. This surface helps with creating the best possible reflection, whilst new advances in screen technology help keep our matte white screen flat and retain its shape and effectiveness over longer periods of time.
