Geat condition! Long length padded maternity winter coat from Mamalicious Maternity.

Manufactured to repel the winters showers, this maternity coat is padded with 280grams to the body, and 180grams padding in the arms, these jackets are fairly lightweight, so ideal for using on public transport or whilst driving in the car.

This is a warm, padded maternity coat that will keep you warm this winter, but is still fairly easy to wear.

The coat does up with a concealed zip, with metal poppers, covered in a concealed cover.

The elasticated drawstring waist belt helps to give this jacket a shape, as well as pull in some shape after baby is born.

Fully lined with quilted satin as well as with front
