The PC was hand built by myself 3-4 years ago and has had some upgrades since then. It is still in great working condition and comes with a legitimate Windows 10 installation. A 24 Inch BENQ LED Monitor can be included at extra cost, as well as a £100 fully mechanical Ducky Keyboard (Hardly Used) and a Razer Abyssus Mouse.
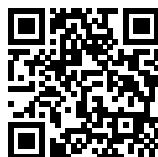

The computer was made for intermediate gaming and with a Graphics Card upgrade, it can be used for much higher end gaming. This computer is very capable for any task you have in mind and is a great starter for someone looking into PC Gaming. For everything I've mentioned, I would like around £550. If you want just the computer tower, £350 or nearest offer. I am willing to.
