

Non-surgical Fat amp Cellulite Reduction - Ultrasound Cavitation

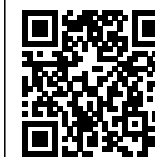

Location

South East, West Sussex

<https://www.freeadsz.co.uk/x-253533-z>

Ultrasound cavitation is a non-surgical, non-invasive treatment that allows the selective reduction of fat and cellulite. It is ideal for targeting those areas of fat that are often resistant to diet and exercise such as love handles, muffin tops, tummies, thighs, backs of arms, man boobs and any area on the body where there is unwanted fat. A circumferential loss of 1-5cm can usually be achieved with each treatment and most clients require a course of treatments for best results. Suitable for men & women Amazing results Safe, painless non-invasive No downtime - clients can return to normal activities immediately Fast treatment times Affordable I also offer effective solutions for tightening sagging or stretched skin. It is possible to achieve results of up to 75% improvement through tripolar radio frequency. This works by tightening the existing collagen and elastin and by causing collagen induction - this way you get some immediate and also longer term effects. I am an experienced and qualified beauty therapist and I am qualified also in ultrasound treatment and cavitation for fat reduction. Treatments are available by appointment on the outskirts of Billingshurst. Please visit my website for more information on this and my other treatments: <http://radiancebeauty.weebly.com/cavitation--inch-loss.html> I welcome telephone enquiries so that I can explain the treatment and discuss client goals and suitability. Prior to treatment, all clients must attend a consultation and complete a medical form. 07535
