

http://www.canaryelectronics.com/index.php?id_product=113&controller=product&id_lang=1 ames per second, with up to 65 JPEG or 16 RAW images in one burst.

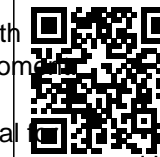

Use the autofocus points individually, in small groups or as an active area, where the closest object is dictates focus accuracy. A dedicated AF area selection button next to the shutter release allows fast mode switching, without moving the camera from your eye. Use different focus-point selections and focus modes for upright and horizontal camera orientations

Its native ISO range of ISO 100-12800 lets you shoot in low light conditions with faster shutter speeds whilst maintaining high image quality.

Expert designed offers professional control

The high-spec EOS 70D offers a professionally-engineered body designed for comfort and speedy operation. An Intelligent Viewfinder, with 98% frame coverage and 0.95x magnification, allows you to easily frame images and visualise settings using the electronic overlay.

Large and bright, it includes currently active focus points, an optional gridline overlay and an electronic level for straighter horizons. A 22 mm eye point gives a relaxed, comfortable view. Keep track of shutter speed, aperture and ISO, exposure compensation, battery status and more.

The camera's frequently used settings such as ISO, Aperture, Shutter speed, White balance, position, focus, etc., quickly change settings by centering the thumb over the icons.

The 90° flip angle (see below) CD II lens can shoot with up to 8 MP HDQk dot resolution. The ideal for shooting video, or composing photos from unusual, creative angles. The capacitive screen supports multi-touch gestures like swiping and pinch-zooming, navigate menus, amend settings or flick through images smoothly.

Easy control and instant sharing with built-in Wi-Fi

The Canon EOS 70D DSLR houses a built-in wireless transmitter offering several connectivity options.

Easily share images and remotely control aperture, shutter speed, and ISO from a smartphone using the EOS Remote app, or from a PC or Mac running EOS Utility software. Live View mode can be used remotely, as well as image reviewing and rating.

Explore new perspectives, or shoot from a short distance— just the thing for photographing wildlife and similar sensitive subjects.

Create Full HD Movies with an SLR

As well as beautiful still images, the EOS 70D DSLR allows you to capture high-quality movies effortlessly. Shoot Full HD 1920 x 1080p video with a choice of frame rates, including 30, 25 or 24 fps, and 60 and 50 fps at 720p for detailed slow-motion. Enjoy full manual control over exposure, white balance and sound, plus a range of compression options for post-editing and sharing.

New Dual Pixel CMOS AF allows Movie Servo AF mode to track subjects as they move, or even as shots are recomposed, so they're always in focus. Choose different focus areas over 80% of the frame by simply tapping the touch-screen. Usable during recording, this ensures that movies stay sharp and clear should subjects move or compositions change.

Full compatibility with Canon STM lenses makes for smooth, quiet, autofocus when shooting Full HD video. Using stepper-motor technology for fluid focus transitions, STM lenses are ideal for DSLR videographers, eliminating distracting focusing noise.

Digital sound can be recorded using the EOS 70D's built-in stereo microphone or by connecting an external microphone via a standard 3.5 mm jack. Set the recording level manually or automatically from commands in the camera's menu.

Realise your creative potential

The Canon EOS 70D DSLR gives you a host of creative modes for easy unique image capture. Difficult, high contrast situations can be overcome with in-camera HDR, merging three exposures into one with increased shadow and highlight detail.

Multiple-exposure mode lets you shoot and combine up to nine exposures into one image, or use a variety of Creative Filters to instantly change the style and look of your shots. Apply multiple Creative Filters to a single image for dozens of combinations to experiment with. Preview effects in Live View mode, or apply them afterwards while reviewing images.

Thanks to the Integrated Speedlite transmitter, it's easy to experiment with creative off-camera flash.

Enjoy in-camera control of multiple Canon Speedlite EX flash units.

Photograph people, landscapes and action in exceptional quality or film subjects in Full HD with unprecedented focus speeds with the Canon EOS 70D Digital SLR Camera, up to the most challenging circumstances with next-generation technologies that taking your shooting to new heights.
