The latest Intel® technology

From editing photos and graphics design to writing essays and reports, the MacBook Pro has the performance you need to get things done.

The 5th generation Intel® Core™ i5 processor features Intel Turbo Boost 2 which increases the speed of the processor to match the task at hand. Turbo Boost reduces power consumption when you're browsing the web and ramps it up when rendering images or editing large audio clips, so you always get the best mix of power and efficiency.

Intel® Iris® graphics and Retina Display

Intel® Iris® graphics and the MacBook Pro's 5th generation processor dramatically improve video and photo performance.

Apple's Retina display has a better-than-HD resolution of 2560 x 1600. When combined with Iris® graphics, you have the clarity, detail and performance you need to create professional documents.

Force Touch trackpad

The MacBook Pro 2015 is the first MacBook to feature Apple's new Force Touch trackpad. Rather than normal 'click', it vibrates to let you know a click has been registered. You click anywhere on the pad, so

you aren't confined to using buttons at the bottom like most trackpads.

You get different results depending on how hard you press, so you can activate double and left clicks simply by pressing slightly harder.

All the normal Apple gestures are still present, so you can move between software, pages and applications with simple finger movements.

OS X Yosemite

The MacBook Pro runs on Apple's intuitive Yosemite operating system. Simple to navigate yet capable of professional-level computing, it lets you to work and play the way you want.

iCloud is integrated throughout the MacBook pro, so you can share documents between all your Apple products and enjoy the peace of mind that comes with automatic backup and Time Machine compatibility.
