Reluctant sale of my 3.0 V6 COUPE 94000 Manual. I have owned this coupe since Feb 2010. RECENTLY CHANGED CAMBELT, Water Pump and Utility belt CHANGED at 89000 (still with parts and labour warranty). Rear Rod arms (may need drop links replaced) Front Discs and Pads Engine Mounts Middle and Rear Box Exhaust Plugs etc on full service MOT MAY 2016 (no advisories) Had an issue with the battery draining after about 9 days. RAC narrowed it down to something on the interior fuses, but not had it checked out by specialist (not an issue if the car is used regularly). Also scratches on front and rear bumpers with usual marks of car of this age. Front drivers seat back doesn't go forward (cable), but electric motor works on moving the seat into positions. When cold an occasional jolt to wheel at first turn, but been like this since I purchased the car. The usual squeaky breaks! ALSO: Some spare parts included! £700
