This is my all original, excellent condition, fully functioning Yamaha QY700 Sequencer and Sound Module. I'm selling because it is getting used less and less as I gravitate to a modular setup. The case is free from wear but being picky I could say it has tiny amount of wear on the left front corner.

This thing just works with zero fuss but with tones of control and features. Turn it on and in a second it's ready to go. Unleash yourself from the computer.

Included is a custom made double sided quilted cover.

Check out ukdotyamahadotcom, search for QY700 for full specifications and features.

The QY700 is a high-end Sequencer Workstation released in the mid to late '90's. It's an all-in-one sequencer with a built-in synthesizer, effects, MIDI and tons of memory! The QY700 makes an excellent alternative to computer-based MIDI studios; the QY700 has the power to be the heart of your MIDI studio.

At its core, it is a programmable MIDI sequencer. It can store up to 110,000 notes, 48 Tracks (32 Linear, 16 Pattern) and 20 Songs. A built-in 3.5 inch disk drive provides external storage. The sequencer has 64 notes of polyphony which is usually more than enough. The sequencer allows recording in Step, Punch-In, and Realtime with overdubbing features. The tempo can range from 5 to 300 bpm and the Conductor Track is very flexible. Thankfully a fairly large 320 x 240 backlit LCD screen makes entry and editing very

easy to see and use.

In addition to controlling your synthesis via the built-in Yamaha sound engine inside, the QY700 features Advanced Wave Memory - as well as Yamaha's own GM and GS General MIDI sound sets. There's also an amazing selection of Yamaha's own sounds to use! You get over 4,000 bass, guitar, and synth sounds. There's even a library of Phrases like intro, fill and ending patterns that you can use. These phrases are highly tweakable and can be made all your own. There's also memory and plenty of built-in effects to use on the internal sounds as well. The QY700 even has a pseudo 2-octave keyboard and assignable midi pitch/mod wheels and programmable foot switches for start, stop, fill, etc. 2 midi out and midi in.
