

GPO 333F wall telephone 1952 (275 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-257777-z>

This is a nice example of a GPO 333L wall mounted telephone. This was nicknamed the rams head due to its appearance. I have fitted it with an electronic microphone, a very best quality hand plated all British manufactured braided handset cord and a GPO specification round plastic line in cord with a UK telephone plug socket. I have fitted a beautiful GPO crown decal to the front giving it a wonderful majestic appearance. This one has a perfect GPO No12 all metal with stainless steel finger dial with a number only dial face. It has been stripped down and rebuilt after each part has been cleaned and polished. It has then been fully tested to dial out and receive perfectly on the UK telephone network using a line simulator and the our own BT land line. This model has a wonderful full bodied double gong ring and is all original.
