DO YOU HAVE A COMPUTER THAT NEEDS FIXING?

my email I fix computers, PCs and laptops netbooks from your home. I will never take your pc, computer, or laptop home to repair unless you're ok with me doing so. If parts are needed, I will tell you what is needed and then help you find the parts as cheap as possible. If I already have the necessary parts for the repair, they will cost £5 pounds each. If the parts required need to be shipped to you, then as soon as they come in you will need to let me know. I will make an appointment to come out and fit them asap. My home number and email will be supplied as soon as you have notified me. My services are cheap and I do not charge vat added tax. The price you see is the price you pay. thank you for looking at my services. I take old scrap laptops and computer towers with faults for spare parts etc. I can also pick up damaged and old computers, but I do not buy them off you, sorry. I believe in recycling old parts and sometimes they just don't work at all, and takes me some time to check for any weather-related damages. If it's been out in the elements, then I'll still happily take it off your hands. 15 years experience here
