

Volkswagen Golf 2000 (400 GBP)

Location **London, London**
<https://www.freeadsz.co.uk/x-269674-z>

Low mileage (66 000) 2 owner VW Golf. We have owned this vehicle since 28/11/2002. It has had new Alternator and clutch in the last 6 months. Tyres all good, exhaust replaced last year to get it through it's MOT. 2 keys, some service history. It drives nicely. Some scratches on body work and the front air dam is slightly out of shape on front off side corner. There is some resonance on a hard right turn, which we have been told by our local garage is the anti roll bar. The car starts really well but there is a slight squeal to the starter motor when starting from cold. Headlights are currently not working, but all other lights are fine. Might be a fuse or a switch, but would need to be put right. I have not done this as I am not using the car. It is off road on a SORN. Its not perfect, but is still good car which will suit someone looking for a reliable run around or alternatively a mechanic who can sort out the little problems. There is a full set of new Volkswagen wheel trims with the car. They were with the vehicle when we brought it, and they have never been used. ;
